AI/ML | Full Stack & Cloud Developer

SUMMARY

AI/ML and Full Stack Developer experienced in designing and deploying real-world intelligent systems using machine learning, NLP, and computer vision. Skilled in building scalable applications, data-driven solutions, and AI-powered platforms.

SKILLS

Programming: Python, JavaScript, C, C++

Frameworks & Cloud: Flask, REST APIs, AWS

AI/ML: Machine Learning, NLP, Computer Vision, LLM Integration, Model Evaluation, AI Agents

Data: Data Cleaning, Preprocessing, Feature Engineering, Analysis

Databases: MySQL, SQLite

Tools: Git, Linux, Postman, OpenCV, TensorFlow

PROJECTS

AI Resume Builder — AI Web Application

- Developed AI-powered web app generating ATS-optimized resumes using Together API, Node.js, Express.js, MongoDB
- Implemented authentication and PDF export using Puppeteer; built scalable backend APIs for real-time resume generation

SkillsSpeak AI — Interview Platform

- Built AI interview system with dynamic questions and real-time evaluation; integrated voice interaction using Mistral-7B
- Designed Flask and JavaScript architecture for seamless end-to-end interview experience

Hospital Management System

- Developed AI-assisted healthcare system with OCR medical report parsing, automated workflows, and admin dashboards

Emojify — Emotion Detection

- Built real-time emotion recognition using OpenCV and TensorFlow; compared CNN, SE-CNN, and CNN+ViT model architectures
- Trained and benchmarked models on FER2013 and AffectNet datasets for robust cross-dataset evaluation

SmartLearn — Quiz Generator

- Generated quizzes from PDFs using NLP pipelines with Hugging Face models for MCQ creation and automated scoring

EXPERIENCE

Data Annotator Intern — Bhatiyani Astute Intelligence

Oct 2025 – Present

- Built annotation pipelines for ML training datasets; improved dataset quality and labeling consistency for NLP models

Intern — Centre of Innovation and Entrepreneurship

Jun 2024 – Aug 2024

- Completed Cyber Security training covering network security, threat analysis, and secure system design fundamentals

EDUCATION

B.Tech (Hons.) Computer Science and Engineering

RV University

GPA: 8.0

2023 – 2027

CERTIFICATIONS

- Cyber Security Fundamentals

CORE COMPETENCIES

Machine Learning Development | Problem Solving | Data Analysis | AI System Design | Research Skills | Team Collaboration
